Description

This starter cable is most commonly (though not exclusively) used for electric start 150cc, 200cc and 250cc ATVs, dirt bikes, go karts, scooters, buggies etc. Very commonly used in association with the popular 9 tooth starter (our part number 30A1090) and 11 tooth starter (our part number 30A1110). Measures 18 inches (46 cm) from end to end.
